

DRY CITRACON[®]

DRY HAEMODIALYSIS CONCENTRATE

**ACID CONCENTRATE USING CITRIC ACID
A KNOWN ANTICOAGULANT**

**THE FIRST MAJOR ADVANCE IN
DIALYSATE IN OVER 25 YEARS**

Citracon[®] is particularly helpful in :

- Better dialysis for those patients where Heparin is contradicted, such as heparin antibodies or allergies.
- Acute dialysis where there is a risk of bleeding
- Preventing dialyzer clotting thus improving dose of dialysis
- Reducing metabolic acidosis
- Increasing reuse of dialyzers

COMPARE THE DIFFERENCE BETWEEN LIQUID & DRY CONC.

Space required for 1000 lit. liquid Conc.
15" x 90" x 70"

Space required for 1000 lit. Dry Conc.
28" x 24" x 14" - Saving 90% space

Transportation - cumbersome and expensive

Transportation - easy and cost is negligible
